Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE one MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following two inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a system for collecting and displaying information by means or steps for interconnecting or communicating between two or more components connected to an interconnection medium, classified in class 710, subclass 100.
 - II. Claims 9-14, drawn to a method of inputting and transmitting information from a restaurant, classified in class 341, subclass 173.
 - III. Claims 15-20, drawn to a restaurant system comprising data processing apparatus for transmitting information therefrom, classified in class 705, subclass 15.

2. The inventions are distinct, each from the other because of the following reasons:

Invention II is related to each of Inventions I and III as process and apparatus for its practice. The inventions are distinct if it can be shown that *either*: (1) the process as claimed can be practiced by another, materially different apparatus, or by hand, *or* (2) the apparatus as claimed can be used to practice another, materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by other, materially different apparatuses, such as, respectively, an apparatus having no display means, or, an apparatus having no processing means.

Art Unit: 2167

Additionally, Invention III is related to Invention I as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, *and* (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In this case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus in accordance with Invention III need not include a display means. The subcombination has separate utility, such as for use in an establishment other than a restaurant.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was placed to Mr. Brian M. Mattson (Reg. N° 35,018), attorney of record, on June 1, 2001, to discuss an oral election to the above restriction requirement, but the call did not result in an election being made.

5. Applicant is advised that a reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).
